VITAL STATISTICS

The number of births reported in September totalled 193,526, representing an increase of almost 20 per cent above the July figure. The quarterly birth rate (July-September) was 28.8 per 1000 population. Deaths reported in September numbered 117,513, a decrease of 12 per cent below the July figure. The quarterly death rate was 20.5 per 1,000 population.

Stillbirths reported were 7,379, only slightly higher than the number in July. The quarterly stillbirth rate was 166.0 per 1,000 births.

Marriages increased sharply (39 percent) above the July figure, totaling 61,102. The quarterly marriage rate was 8.1 per 1,000 population. Divorces also increased greatly (44 per cent) above the July figure. The quarterly divorce rate was 1.6 per 1,000 population. The ratio of marriages to divorces (5.2 to 1) was not greatly different from that in July (5.4 to 1).

Infant deaths decreased considerably (22 per cent) below the July number. The quarterly infant mortality rate was 60.7 per 1,000 live births.

SECTION IX

SOCIAL SECURITY AND INSURANCE

The Insurance Bureau of the Imperial Japanese Government has been contacted on two particular subjects.

- (a) Are there any restrictions in the National Health Insurance or Health Insurance laws which prevent medical care for certain communicable diseases? There are no restrictions except by budget limitations which apply particularly to the National Health Insurance, which is mainly for urban and rural districts. The Health Insurance which is for industrial areas, is in a better position, but has neglected the preventive medicine program because of numerous medical treatment requirements. A preventive medicine program is included in the revised plan for the social insurances.
- (b) Did the Imperial Japanese Government operator make available any social insurance for Koreans in Korea? It is reported that the Seamen's Pension Insurance (1940) was the only one which now is being investigated by this Section as to the extent of operations and benefits available.
